## PERSONAL PROJECTS

---

### Job Portal

- Developed a fully functional job portal where users can post jobs, apply to, or save other job listings, but cannot apply to or save their own postings.
- The platform includes a profile section for viewing saved jobs, applied jobs, and jobs created by the user, with the ability to update profile details. The home page lists jobs with filtering options based on category, location, and skills.
- Additionally, the portal features an admin panel for managing categories, job listings, and job creation/editing.
- **Github Link** - <https://github.com/MurariThakur/jobportal>

### Task Manager

- Developed a Laravel-based task management application featuring user authentication, profile management, and comprehensive task and category management..
- The dashboard offers widgets displaying all tasks, completed tasks, pending tasks, and overdue tasks, along with notifications for impending deadlines.
- Users can see all task but can only edit ,delete their only.
- Additionally, the application includes REST API features for login, registration, and task management, enabling seamless integration with external systems using laravel sanctum package.
